Click the “Settings” icon in the bottom navigation. Customize your settings based on your desired experience and personal sensitivity.

AutoPilot is a setting where all activities read automatically, regardless of sexual activity in the video, and transmits a signal in order to delivers more streamlined experience with your interactive sex toy.

Auto Control is a setting that allows signals to be transmitted to your interactive sex toy consistently when there is and is not action in the video.

Power Control refers to the intensity you wish to have on your interactive sex toy based on your own sexual sensitivity.
